All Star Code

64 Beaver St., Box 152 New
York, NY 10004

To whom it may concern,

My name is Carlos Abdu. I'm a burgeoning front end developer looking to get my foot in the door of web development. As graduate of the GA Web Development Intensive program, I understand how important technology can be in increasing one's opportunities through education. Moreover, as an alumni of the Per Scholas CodeBridge program (which allowed entry into GA), I understand the important significance of providing local communities an entry point to incredible opportunities in the tech field. It would be my pleasure to apply for a position as a Teaching Assistant at the New York location of All Star Code.

I hope that by using the various full-stack development skills I acquired through this program, I can pass along this knowledge the best that I can as a Teaching Assistant for All Star Code. The Teaching Assistants at my school thought me so much about how to approach students to be builders and problem solvers rather than just students. This aided me a lot in learning the core concepts of full-stack development, from front-end to back end. They were also kind enough to lend me a shoulder whenever life seems to be too hard. I want to be that same kind of support for any students who wants to go through such an experience. Finally, I believe this job would a great opportunity to practice and perfect my craft as a web developer in an environment conducive to learning.

Attached is my resume and a Linked-in page. You can also see my web portfolio on this link - <http://fine-love.surge.sh>. If you require more information or materials, please feel free to contact me through the e-mail and phone provided. Thank you for your time and consideration. I look forward the hearing from you.

Regards,

Carlos
Abdu
